## SUMMARY

I am an enthusiastic software engineering student at Tek-Up, currently seeking an end-of-study internship in web or mobile development, software development, or DevOps, where I can apply my academic skills and gain valuable industry experience.

---

## EDUCATION

2018-2019 : Bachelor of Science - Al Wafa High School, TUNIS  
2019-2022 : Bachelor's Degree in Computer Science and Multimedia - SESAME university, TUNIS  
2022-present : Engineering Cycle in Software Engineering and Information Systems - TEK-UP university, TUNIS

---

## INTERNSHIPS

**Coficab ( automotive cable production world leader)** **August 2021**  
**Observer Intern**

Observation and familiarization with the company's operations, particularly the MES (manufacturing execution system) and ERP information systems.

**Bridges Engineering International** **March 2022 - July 2022**  
**Full-Stack Web Development Intern**

My final project at Bridges Engineering involved creating an online platform that facilitates collaboration between interior architects and their clients. The main goal was to allow the interior architect to present their work and ideas interactively, while giving the client the ability to visualize them. ( MEAN stack )

**GhazelaTechAcademy** **June 2024 - August 2024**  
**Software Developer Intern**

Developed a desktop Point of Sale (POS) application using Flutter/Dart for managing products and sales, with features like offline/online modes and automatic data synchronization between local SQLite databases and remote APIs

---

## UNIVERSITY PROJECTS

### Online Medical Appointment Booking Project (MERN stack)

Developed a website that allows patients to schedule, cancel, and modify medical appointments with doctors, utilizing the MERN stack (MongoDB, Express.js, React.js, Node.js). The system includes appointment management features, doctor availability scheduling, and secure user authentication for both patients and doctors.

### HR Management System (React, MySQL, Express, Node.js)

Create an HR management site where employees can manage info, attendance, and leave requests, while HR handles records and approvals. Built with React, MySQL, Express, and Node.js for secure authentication and notifications.

---

## SKILLS

**Web Development** : HTML, CSS, JavaScript, React.js, Angular.js

**Backend Development** : Node.js, Python

**Databases** : MongoDB, MySQL

**Mobile Development** : Ionic, Flutter

**DevOps** : Docker, Kubernetes

**Version control** : Git, Github
